PROFESSIONAL SUMMARY

Senior Mobile Developer with 7+ years of experience, 6+ of them specializing in Flutter, having built and published 48+ cross-platform apps for iOS and Android, including TicketMX — one of Saudi Arabia's largest ticketing platforms with 30M+ downloads and 100M+ tickets booked. Strong in clean architecture, scalable state management (Bloc, Riverpod, Provider), secure payment integration, and hardware-integrated solutions. Recently extended into AI, building LLM and RAG-powered features with Python and the OpenAI API. Proven delivery for government bodies and large-scale commercial clients across ticketing, e-commerce, POS, and booking domains.

WORK EXPERIENCE

Senior Flutter Developer — BARMJAK (Remote) *Jul 2023 – Present*

- Lead Flutter development across a portfolio of production apps spanning e-commerce, POS, booking, and marketplace domains, architected with clean, modular, and testable codebases.
- Integrated complex native features including Apple Pay, Google Sign-In, deferred deep linking, push notifications, and in-app printing for POS and receipt systems.
- Implemented secure, PCI-conscious payment flows using myFatoorah and multiple gateways across e-commerce and booking products.
- Automated build and release pipelines with Fastlane, Bitrise, and GitHub Actions, managing App Store and Google Play deployments through robust CI/CD workflows.
- Led technical reviews, refactoring initiatives, and feature planning to maintain code quality and long-term scalability across the app portfolio.

Selected Projects

Smile POS: Full POS system managing sales, employees, customer engagement, and receipt printing.

Vecasa: Cross-platform e-commerce application. iOS

Alsalman: Multi-vendor e-commerce platform. Store

Ghaslah: Car-wash booking service with admin management app. Store

Flutter Developer — SparkSys *Jul 2021 – Jul 2023*

- Architected and shipped **TicketMX**, a high-traffic ticketing platform serving 30M+ downloads and processing 100M+ ticket bookings, with live seat selection, interactive venue maps, in-app wallet, and multiple payment gateways.
- Delivered apps for major government clients including the Saudi Ministry of Sports (SaudiTickets) and the Ministry of Hajj & Umrah (Hajj Expo), meeting strict compliance and high-load event requirements.
- Built Sela Super App, integrating event booking, logistics, and multiple services into a single platform for the Saudi market.
- Developed hardware-integrated scanning apps for gate entry, accreditation, and access control using Honeywell, Bluebird, and SaveoBolt laser/QR scanners.
- Implemented offline-first architecture for field apps (e.g. Al Moasser school delivery) ensuring reliable operation without connectivity.

Selected Projects

TicketMX: One of Saudi Arabia's largest ticketing platforms (Riyadh & Jeddah seasons) — seat selection, maps, wallet, scanning. iOS | Android

SaudiTickets: Match-booking platform for the Saudi Ministry of Sports. iOS | Android

Sela Super App: Comprehensive super app integrating event booking, logistics, and services for the Saudi market. iOS | Android

Hajj Expo: Conference and exhibition app for the Ministry of Hajj & Umrah. iOS | Android

Flutter Developer — SeoEra (Egypt) *Mar 2020 – Jul 2021*

- Built native iOS applications in Swift (UIKit/Storyboard), including the company ERP system and TheGate1, alongside cross-platform work across education, logistics, and e-commerce.
- Built **PM Tricks**, a certification-prep app (PMP, PMI-RMP, PMI-SP) that reached 20K+ downloads with strong stability and performance ratings.
- Integrated Firebase services, myFatoorah payments, and custom RESTful APIs for dynamic, secure app experiences across multiple production releases.

Selected Projects

PM Tricks: Learning-support app for PMP, PMI-RMP, and PMI-SP exam preparation (20K+ downloads). iOS | Android

Truckar: App for truck drivers to review and manage shipment requests. iOS | Android

ADDITIONAL PORTFOLIO (48+ PUBLISHED APPS)

40+ further published apps across these domains — full interactive list with store links at mohamedaty.is-a.dev:

Ticketing & Events: S-Photo, BBT RedTown, Slots, 4x4, Glamour Gym, 2M Rent Car.

E-commerce & Marketplace: Livi, Melocana, RAZZA, Morgap, Soor, Al Mulla Farms, Montajat, Baqqah, Jarra, Lady In, Dewan, Prestige, Organz, Square, TIS The Season, HoodiFit.

POS & Business: PosMX, ATMETA.

Logistics & Government: LogiMX, Al Moasser (offline-capable school delivery), MFA Scanner (Egyptian Ministry of Foreign Affairs).

Hardware-Integrated Scanners: 6+ scanner apps for ticketing, accreditation, and access control (Honeywell, Bluebird, IMIN, QR) — TicketMX Scanner, AccreditMX, Access Badge, S-Photo Scanner.

Games: Play Nuqat, Thabbit, Falta (trivia games).

Food & Diet: Gahwa, Hababah, Sultani, Lions KW, U-pick.

AI & MACHINE LEARNING

Building LLM-powered features into mobile products, with hands-on Python and retrieval-augmented generation (RAG).

Ansaby AI Assistant: Designed and built a RAG-based chatbot that answers natural-language questions about a user's family tree and relatives, grounded in the app's own data. Built with the OpenAI API, integrated into the Ansaby Flutter app.

Stack: Python, OpenAI API, Claude, DeepSeek, Qwen, RAG pipelines, embeddings & vector search, prompt engineering, LLM integration in Flutter

SKILLS & TECHNOLOGIES

Flutter & Dart: Flutter SDK, Material & Cupertino, State Management (Bloc, Cubit, Riverpod, Provider, GetX), Freezed, json_serializable, get_it, Melos, Flavors, Custom Animations, Responsive & Adaptive UI, Modular Architecture

Languages: Dart, Python, Swift, Objective-C, Kotlin, Java — iOS App Clips, Home Screen Widgets, Live Activities, Android WorkManager, Platform Channels

Architecture: Clean Architecture, MVVM, MVC, SOLID, Repository Pattern, Dependency Injection, Modularization

Backend & APIs: RESTful APIs, GraphQL, Retrofit, Firebase, AWS Amplify, WebSockets, Socket.io, Agora/WebRTC, Google Maps SDK, Push Notifications

Databases: Hive, Isar, SQFlite, SQLite, Secure Storage, Shared Preferences, Firebase Firestore

Networking & Security: Dio, HTTP, SSL Pinning, JWT, OAuth2, Data Encryption

CI/CD & DevOps: Git, GitHub, GitLab, Jenkins, Bitrise, Fastlane, GitHub Actions, Firebase Crashlytics, Analytics, Remote Config, Sentry, App Store & Play Store Release Management

Testing: Unit, Widget & Integration Testing (Flutter Test)

Tools: Figma, Adobe XD, Jira, Confluence, Trello, Azure Boards, Postman, Charles Proxy, Agile & Scrum

AI-Assisted Development: Claude, Cursor, GitHub Copilot, Codex

EDUCATION & LANGUAGES

B.Sc. Computer Science — Misr University for Science & Technology, 2018

Languages: Arabic (Native), English (Professional proficiency)
